A member of Sage FAS Gov — an integrated fixed asset management solution.

For maximum performance and scalability in fixed asset management, FAS Gov Asset Inventory *for SQL Server* provides complete fixed asset inventory tracking and reconciliation capabilities for government, school, and non-profit organizations with SQL Server based computing environments needing help with GASB 34/35 requirements. Using state-of-the-art bar code technology, including Windows CE and Palm OS devices, FAS Gov Asset Inventory *for SQL Server* creates and tracks multiple physical inventories of assets quickly and efficiently—so you achieve tighter control over your fixed assets.

Gain greater speed and scalability for tracking assets.

- Seamless integration with FAS Gov Asset Accounting *for SQL Server*
- Enhanced history tracking captures critical “before and after” asset conditions
- Faster processing times with the SQL Server and Windows Server infrastructures
- Scalability with client/server architecture and support for multiple databases
- Conduct multiple inventories concurrently at various sites and reconcile data at one central location
- Supports both types of inventories—*Baseline* to add new assets, and *Dynamic* to verify information on existing assets

(over, please...)

FAS Gov Asset Inventory for SQL Server

Hand held devices make
conducting inventories easy.

- “Import/Export Helper” allows you to import data from, or export data to, the most popular spreadsheet and database applications
- Affordable Windows CE and Palm OS inventory readers make it easy to perform inventories
- On-screen “Virtual Reader” lets you perform a test inventory—and even add assets—before you invest in hardware
- Over fifty fully customizable data entry fields
- Record important details by attaching notes, photos, or documents to individual assets
- “Secondary Tag” field allows you to summarize assets by room
- Fixed asset inventory labels available for purchase online at www.sagefasgov.com/labels

The Sage FAS Gov family includes:
