insights for the life of your organization™

All around the nation, your peers are getting the results they need. Here's what they have to say:

"FAS Gov will enable our districts to create necessary auditing and financial reports needed for proper capital asset accounting."

— Jon Joyner
Director of Administrative Technology for Georgia DOE

"We looked at 15 different software programs, and FAS Gov Asset Accounting was the most user-friendly GASB 34/35 compliance solution."

— Sharon Barber
Fixed Asset Manager for the City of Slidell, LA

"UMUC looked at half a dozen systems over a period of several months, and in every functional category, FAS Gov was the clear choice. No other system came close."

— Gil Brown
consultant managing the FAS Gov Suite implementation for UMUC's finance division

Introducing the one solution for all your fixed asset management needs—including GASB 34/35 requirements.

It's a big challenge. The Governmental Accounting Standards Board (GASB) Statements 34/35 are making fixed asset management vitally important to the success of government, school, and non-profit organizations.

Yet one solution helps meet the GASB 34/35 requirements while handling all other fixed asset management tasks: FAS Gov.

With FAS Gov, you get total command over the entire fixed asset lifecycle—from acquisition to disposal. Everything you need comes in one powerful, flexible, and affordable package. FAS Gov helps you:

- Conduct an initial audit of your capital and infrastructure assets
- Manage and calculate depreciation for your capital and infrastructure assets
- Maintain ongoing tracking and reporting for your fixed assets

The FAS Gov Solution

As you know, GASB 34/35 requires all state and local government, school, and non-profit organizations to value, inventory, track, depreciate, and report on fixed assets.

While these are precise and challenging mandates issued by GASB, meeting these mandates is easy with FAS Gov. Our decision-making tools are perfect for managing and depreciating diverse capital and infrastructure assets from laptops and desk lamps to roads and bridges.

Put simply, FAS Gov is the perfect solution for fixed asset management in the public sector.

"FAS has an intuitive interface, quick data entry, many options and holds lots of detailed data."

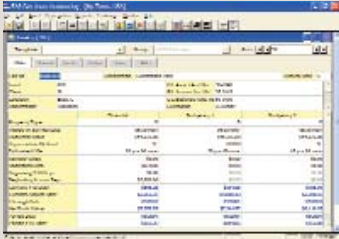

— The CPA Software News
awarding FAS with its 5-star rating

Financial reporting made easy.

One of the biggest tasks associated with GASB 34/35 compliance is producing the numerous required reports. But with FAS Gov, GASB reporting is a snap! Thanks to more than 20 pre-formatted GASB-compliant reports—all designed to help you with your year-end financials—you'll be able to easily report on depreciation by function, year-by-year comparison of capital assets, and allocation schemas for all assets.

Answers to your questions (and much more) are just a call or click away.
